

## Thoracic Surgeon – Raleigh, NC

UNC Rex is seeking a Thoracic Surgeon. Ideal candidates should have experience in the robot-assisted treatment of thoracic surgical disease including benign and malignant disease of esophagus, foregut, lung, mediastinum, pleura, chest wall, trachea and diaphragm. Additionally, candidates will have experience in robot-assisted lobectomy and robot-assisted esophagectomy. Advanced endoscopic procedures and first rib resection or pectus repair a plus. Candidates will be board-certified or board-eligible in thoracic surgery. We employ a multidisciplinary thoracic team approach and offer the most advanced diagnostic and therapeutic care available outside an academic medical center.

Our care team offers the latest treatment options and access to all the support and resources offered at UNC Rex. Our board-certified specialists have been trained at some of the top programs in their fields, and they continue to learn new techniques to better our patient care. This high volume and growing practice is in an ideal location with an excellent work/life balance.
